

E-version

Electrical model with propulsion support.

The E-version for adults is available for the **LAGOON** and the **VINTAGE** version. The electric tricycle will allow you to go further, easier and faster.

The operating system is very easy to use. A simple **ON/OFF** switch at the battery and a controller at the steering wheel to get started. It is also equipped with a **BOOSTER** button to give a quick acceleration to the tricycle (for example when you need to start uphill).

The battery pack, located at the back of the tricycle is light and removable, allowing you to easily recharge it at home.

The electrical assistance will power the front wheel of the tricycle.

E-Version

Inside leg
from 75 to 108 cm
